CAREER OBJECTIVE

I aspire to pursue my career in a prestigious firm like yours, in order to enhance my skills and contributing those for the successful functioning of the organization

EXPERIENCE

Verizon, Hyderabad — Engg. III

APRIL 2022 - Present

- As per the business requirements, we have developed **Manage Subscriptions Dashboard** in ACSS(Automated Customer Service Support) Application for Customer Representatives in Verizon using React.
- For interacting with the 3rd party vendors, we developed backend microservices in spring boot and maintained a code coverage of 80% and above.

Deloitte, Hyderabad — Analyst

JUNE 2021 - APRIL 2022

- As a Developer, I've contributed my work to the **Subscription Admin Internal Portal** for Health care works to get updates regarding the vitals of the patients in ReactJs for **Ascension Health**s.
- Developed API's for EDSL Read Service using Spring boot and Microservices and deployed the application to PCF, which is hosted in GCP.

TCS, Hyderabad — System Engineer

MARCH 2018 - JUNE 2021

- Being a Software Developer, I'm involved in designing, developing and testing the API's in Spring boot, in order to render the outcomes according to the design specifications for **Qantas Airways**.
- Attended daily scrum meetings, sprint planning and sprint retrospectives to avoid backlogs in upcoming sprints.

Tech Mahindra, Hyderabad — Associate Technical Support

NOVEMBER 2017 - FEBRUARY 2018

- As part of the Business Process Outsourcing, I've worked as a Technical Support for **Verizon**, in resolving technical issues faced by the customers of the company.

JUNE 2011 - MAY 2013

M. P. C - 90%

CERTIFICATIONS

Java (Basic) by HackerRank

Machine Learning by Udemy

PROJECTS

Automated Customer Service Support(ACSS) — Created Manage Subscriptions Dashboard for Customer Reps.

APRIL 2022 - Present

- Developed Manage Subscriptions Dashboard for the cust. rep to easily manage Ehub(Entertainment Hub) subscriptions like Netflix, Youtube, Disney+ for the customers in React.
- In the ACSS application, the cust. rep will provide/monitor all the **Ehub(Entertainment Hub)** content for the customer, which is tied up with 3rd party external vendors like **Bango & HyperWallet**.
- ACSS app. is interacting with cxp aggregate service, which is a middleware application, that combines all the data from different sub-domains like cxp acc. management, cxp order management, EPC services(for product details), OMP(for product offers), Vision, VEPS, EPS (for retrieving wallet info), UTE(for Tax info), etc.
- Developed Backend application for interacting with cxp aggregate service and maintained a code coverage of 80%.
- App deployment is done in AWS k8's cluster, for monitoring purposes, we use kibana dashboard and Apigee for gateway.

Ascension Healths — Developing API's in backend and UI in frontend for internal admin portal

JUNE 2021 - APRIL 2022

- Created API's for Enterprise Data Service Layer(EDSL) Application, which connects with FHIR Store in GCP, to retrieve the data of the patients.
- Written Unit tests, Component tests and Integration Tests for the testing of the functionality of the application.
- Developed Navigation bar in Subscription Admin Portal in ReactJs framework for the ease of switching between the tabs.
- Implemented Collapsible row in subscriptions table to render the detailed view of subscriptions.
- For the Code coverage, I've written unit tests using Jest Framework in UI.

Qantas Airways — *Creating middleware api's for qantas.com*

JULY 2020 - JUNE 2021

- Created API's for RedApp Customer Feedback Service
- Implemented Simple Notification Service in AWS for the api, wherein the ground staff of qantas airways would be raising the feedback request on behalf of customers.
- Junit test cases had been implemented, for assurance of robust functionality of the code.
- Fixed SAST issues, which are vulnerable for the code exposure.
- Continuous Integration and Continuous Deployment had been achieved with the help of Bamboo pipelines, Git and Bitbucket.
- Registered api's of aws ec2 instances with wso2 api gateway for securing, dns masking and exposing those to the external world.
